INTERNSHIP

Software Engineering Intern
State Secretariat for Education and Sports - SEDUC AM, Feb 2017 - Jun 2017

Developed an intranet system using Drupal for educational purposes, used by students within a lab environment.

PROFILE

Senior Full Stack Developer with over 7 years of extensive experience in software and database development. Known for ethical professionalism, strong teamwork, and excellent interpersonal skills. I bring a dynamic approach to solving problems and a commitment to continuous learning and mentoring others. Proficient in front-end frameworks such as Angular and React, and back-end technologies like Node.js and Spring Boot. Well-versed in design patterns, agile methodologies, unit and automated testing, code versioning, and database management.

WORK EXPERIENCE

Sr Software Engineer

Novatics / client: Appen 2026 - Present

- Building and maintaining distributed systems for a global leader in AI training data, with Spring Boot, React.js, AWS and Apache Kafka.
- Using coding agents daily with written plans, acceptance checks, independent review and human merge.
- **Key technologies:** React.js, Spring Boot, AWS, Kafka, Rollbar, New Relic.

Contributor Developer

Amazonas Court of Justice (TJAM) 2025 - Present

- Contributing to PROJUDI, the electronic judicial process system of the Amazonas Court of Justice, during its migration to modern technologies.
- **Key technologies:** Java.
